

Java Fundamentals: Armstrong Number Assignment - 4

Problem Statement:

You are required to develop a Java program to check whether a given number is an Armstrong number or not. An Armstrong number (also known as a narcissistic number, pluperfect digital invariant, or pluperfect digital number) is a number that is equal to the sum of its own digits each raised to the power of the number of digits.

Requirements:

1. The program should prompt the user to enter a positive integer.
2. Check whether the entered number is an Armstrong number or not.
3. Display an appropriate message indicating whether the number is an Armstrong number or not.
